E9X HIGH DEPENDENCY BED

Enterprise 9000X

Designed for you and your patient

The Enterprise 9000X hospital bed from Arjo delivers significant benefits to the patient, caregiver and healthcare facility. The daily challenges faced by nursing teams on hospital wards have inspired Arjo to improve upon an established solution, trusted by hospitals around the globe. In the development of the Enterprise 9000X hospital bed, Arjo has focused on key customer needs common to all healthcare environments, namely:

- Security for both patient and carer.
- Compliance with new international standards.
- Equipment that is robust, intuitive and easy to use.
- Solutions focused on the quality of care for patients.

The Enterprise 9000X bed for intensive care and high dependency patients, is based on the key features of the Enterprise 5000X and 8000X hospital beds, with additional focus on patient Security and clinical functionality. With its patented profiling system, integrated weighing scale, bed exit alarm and under-bed anti-entrapment sensors, the bed has been designed with the patient, caregiver and facility in mind.

Key Features

BIO-CONTOUR PROFILING The patented Bio-Contour profiling system blends a unique combination of bed movements with a curved mattress deck.

WEIGH SCALE

The simple to use intergrated weigh scale can weigh up to 250 kg (550 lbs). Weighing can be carried out in any position, and items added or taken away using the autocompensation facility without affecting the patient's weight.

CARDIAC CHAIR POSITION The caregiver can easily adjust the bed into a cardiac chair position with our simple to use control panel.

3 STEP BED EXTENSION Different bed lengths are now easily configurable in a single sub-frame, offering a simple to use, multi-length hospital bed for greater flexibility and choice.

ANTI-ENTRAPMENT SENSORS The anti-entrapment sensors can detect an object/person underneath the bed. If

he beam is interrupted whilst the mattress platform is being lowered, the mattress platform will automatically move up and away from the obstruction, reducing the risk of entrapment.

LOW HEIGHT A key advantage in reducing the risk of injury through falls.

UNDERBED LIGHT The bed exit area on both sides of the bed is illuminated to help guide patients when leaving the bed in a poorly lit room.

PIT STOP MAINTENANCE Designed for 'Pit Stop Maintenance'- open accessibility means changes such as actuator, control box and battery can be carried out in situ within a few minutes by

one person.

30 DEGREE BACKREST ANGLE The backrest will pause when raised or lowered to an angle of 30 degrees, ensuring easy and positive backrest adjustment time after time.

INFECTION CONTROL

The open architecture design allows ease of access to help improve decontamination procedures. Deck sheets are lightweight, smooth and easily removed.

BED EXIT ALARM

When enabled, the bed exit function can detect patient movement at differing sensitivity levels and trigger an audible alarm to alert medical staff.

INDIGO (OPTIONAL) IndiGo is the powered 5th wheel that makes lighter transport available to any caregiver with just a touch - for comfort and simplicity. IndiGo is always available and built directly into your Citadel or Enterprise bed.

	Overall standard length	2350 mm (HOB), 2300 mm (HOD)
	Overall width	1030 mm
	Mattress length standard	2020 mm
	Mattress width	880 mm
	Overall extended length	2470 mm (HOB), 2420 mm (HOD)
	Mattress extended length	2140 mm
	Overall length short	2240 mm (HOB), 2190 mm (HOD)
	Mattress length short	1910 mm
	Top height (with 125 mm castors)	760 mm
	Low height (with 125 mm castors)	320 mm
	Backrest length	850 mm
	Seat length	215 mm
	Calf length	560 mm
	Thigh length	365 mm

PRODUCT	MEASUREMENT
SWL/Maximum patient weight	250 kg (551 ¼ lbs.) / 185 kg (407 lbs.)
Head end panel 'off' base configuration	
Standard	IEC60601-2-52
ELECTRICAL	DATA
Ingress protection	IPX4
Shock protection	Class 1, Type B
Power in	3 A max. at 230 V a.c. 50/60 Hz
Power in	5.8 A max. 120 V a.c. 60 Hz

Soft drop sides are included as standard for smooth release and controlled descent
