C. Able to partially bear weight on at least one leg. Uses a wheelchair for moving a distance.

D. Unable to weight bear through feet. Is able to sit if well supported. Please contact Arjo for further information.

- **Enhancing mobility through exercises**
With a detachable foot plate and the support of the arc rest and sling, Sara Plus is designed to support balance, stepping and gait training.
- **Upper body support**
The arc rest is an integral part of the lifting mechanism, providing additional upper body support during the raising action.
- **One caregiver**
Designed for operation by a single caregiver, Sara Plus can be a cost-effective solution for standing transfers, stepping and gait training.
- **Sling solutions**
The sling is designed specifically for Sara Plus. It provides a secure attachment to the lifter that holds and supports the patient or resident close to the arc rest. Various sling types are available: standing, transfer/walking, and wipeable.
- **Scale as option**
Optional built-in scale contributes to an easier weighing routine.

Key features

ARC REST

The arc rest supports the patient's arms and upper body and can help them support their weight through their shoulders in addition to their feet.

PRO-ACTIVE PAD

The pro-active knee pad provides support and stability, while also allowing natural forward movement of the knees and flexion of the ankles during standing and sitting actions.

DETACHABLE FOOTPLATE

Detachable footplate enables stepping and gait training with the patient's feet directly on the floor.

DUAL CONTROLS

Dual controls on the mast and the hand control. The hand control enables the caregiver to move and stay close to the patient and maintain good eye contact throughout the process.

SCALE (OPTION)

The scale can be used to weigh patients, and monitor their weight-bearing capacity when Sara Plus is used without the footplate.

PRODUCT INFORMATION

Max. SWL	190 kg	420 lb
Lifter weight (incl battery)	78.7 kg	173.5 lb
Min total storage height	1195 mm	47 in
Min lifting height	906 mm	35 5/8 in
Max lifting height	1497 mm	58 7/8 in
External width legs closed	646 mm	25 3/8 in
External width legs open	1107 mm	44 in
Internal width leg closed	534 mm	21 in
Internal width leg open	1002 mm	39 5/8 in
Leg clearance (floor to top of legs)	116 mm	4 1/2 in
Chassis clearance (floor to bottom of chassis)	30 mm	1 1/2 in
Lifter total length	1033 mm	40 5/8 in
Turning radius	1235 mm	48 5/8 in
Lifter protection class	IPX4	
Hand control protection class	IPX7	
Battery	24V, 6 Ah	
Battery charge indicator		
Service meter - displays the total time in use (hours)		
Emergency stop and system failure override		
Automatic cut out if lowered onto an obstacle		
Low-friction castors, the rear two with brakes		

ACCESSORIES

- Wide range of washable, disposable and wipeable slings available
- Commode seat
- Foot board narrow
- Foot board extension
- Kneepad wide
- Kneepad fleece cover
- Arm straps
- Leg straps
- Optional: Integrated scale

SPACE REQUIREMENT

- Blue area shows the minimum working area required to enable the caregiver to use the mechanical aids ergonomically from one side.
- Light blue area shows extension of working area required to facilitate activities from either side to provide adequate access for the patient, mechanical aid and caregiver.
